

SANJAY VINAYAGAMOORTHY

Chennai, T.N, India | vsanjay7996@gmail.com | 9790741072

OBJECTIVE

Highly skilled **Quality Analyst** with 7 years of experience in **Energy & Utilities, Healthcare, and Life Sciences** domains and currently practicing as a **Business Analyst** for the past year in the **Life Sciences** industry. Strong expertise in **Integration Testing**, including **ETL testing** across platforms, and in conducting **Operational Qualification (OQ)** and **Performance Qualification (PQ)** testing to ensure that systems and processes meet required business and regulatory standards. Adept at bridging the gap between technical teams and business stakeholders, working collaboratively to define functional requirements, implement solutions, and optimize business processes.

EXPERIENCE

Accenture India Pvt Ltd

Quality Analyst/Specialist – Integration Testing | June '2023 – Till Date

Client: Novartis

Domain: Life science

Project: Novartis – Clinical Trial Management System – Veeva Vault

Technology: Veeva Vault Integration Validation, Oracle SQL, TIBCO Data Hub, Post man, HP ALM.

- Led **integration testing** efforts for a **Life Sciences** project on the **Veeva Vault** platform, ensuring seamless data integration across systems within a highly regulated environment.
- Conducted **ETL testing**, validating the **extraction, transformation, and loading** of data between Veeva Vault and other systems, ensuring accurate data flow and compliance with regulatory standards.
- Designed and executed **Operational Qualification (OQ)** and **Performance Qualification (PQ)** testing, ensuring that all systems met functional and business requirements.
- Worked closely with cross-functional teams, including developers, business analysts, and stakeholders, to define testing requirements and ensure alignment between business needs and technical capabilities.
- Conducted root cause analysis for identified issues by doing intense data analysis across various data layers and providing actionable feedback to development teams
- Ensured compliance with industry standards and best practices in ETL testing.

- Following E2E agile methodology for transparent and efficient effort tracking this includes participation in daily stand-up calls, retrospective meetings, Backlog refinement meetings, Sprint planning sessions.
- Providing overall sign-off to Data Officers, Project Owners with detailed test execution report which contains Test case#, Pass Rate%, Defect Summary.
- Analyzed complex **SQL queries** to understand data flow between various tables, identified and resolved issues by interpreting query filters, and supported the team during the **OQ phase**.
- Providing resources estimations for new requirements and change request, calculation man hours requirements
- Participating in design review meetings and BA analysis calls to provide update on test scenarios and execution timelines.
- Presenting cross training sessions on Integration and ETL Testing, in-depth business overview for new resources.
- Actively participated in **UAT (User Acceptance Testing)**, working with end-users to verify that the system met the business requirements.
- Using **HP ALM** tool to support traceability across all stages of the software test lifecycle
- Collaborated with stakeholders to gather and analyse business requirements for **clinical trials** and healthcare-related applications.
- Worked closely with **cross-functional teams** to translate business needs into technical requirements and ensure alignment with project goals.
- Developed user stories, use cases, and business process flows to support system development and process improvements.
- Conducted gap analysis to identify opportunities for process optimization and recommend solutions for improving efficiency and reducing risks.
- Facilitated workshops and meetings with subject matter experts to define and document business requirements for clinical systems, ensuring compliance with regulatory standards.
- Supported the testing phase by reviewing test scenarios and validating that business requirements were met in the final product.
- Participated in the creation of business cases and reports to track project progress, ensuring that the solution met business objectives and regulatory requirements.
- Provided end-users with training and ongoing support to enhance system adoption and address any business concerns or technical challenges.
- Proficient in utilizing advanced **Excel functions** (VLOOKUP, INDEX-MATCH, Pivot Tables, etc.) for technical data mapping and analysis.
- Coordinated with **stakeholders** to gather business requirements and convert them into detailed data mapping documents using Excel.
- Created and maintained **complex Excel spreadsheets** to map business requirements to technical specifications, ensuring smooth **data integration** between systems.

- Leveraged Excel's **data visualization tools** to present technical data mapping insights to both technical teams and business stakeholders.

Accenture India Pvt Ltd

Quality Analyst – Salesforce testing | June '2021 – June '2023

Client: CVS Pharmacy

Domain: Healthcare

Project: CVS Pharmacy – Workforce Initiative – Salesforce

Technology: Salesforce application, Tricentis qtest.

- Conducted comprehensive **Salesforce application testing**, including functional, regression, and integration testing, ensuring the system met business requirements and was free from critical defects.
- Identified and reported critical defects during testing, working closely with the **development team** to troubleshoot and resolve issues quickly. I played a key role in ensuring timely resolution of defects before production deployment.
- Collaborated with **business analysts** and **developers** to understand detailed requirements, contributing to the creation of comprehensive **test plans**, **test cases**, and **test scripts** to ensure complete coverage of functional and non-functional requirements.
- Actively participated in **requirements review sessions**, providing valuable insights into test coverage, potential risks, and improvement areas. Collaborated with the team to adjust test strategies and plans based on evolving requirements.
- Ensured the availability and accuracy of test data and environments, which included managing test environments in Salesforce and maintaining consistency across multiple stages of testing.
- Utilized **Jira** for defect management, ensuring issues were properly documented, tracked, and resolved. Provided regular **status updates** on defect resolution progress, test results, and testing coverage to the **project team** and **stakeholders**.
- Worked closely with **business users** to validate that the application met their expectations and requirements, ensuring all functionalities aligned with business objectives and user needs.
- Actively contributed to **test planning** and **strategy discussions**, offering feedback for process improvements to increase the efficiency and effectiveness of testing. Ensured that the testing process was continuously optimized based on the lessons learned from each release.

Cognizant Technology Services Pvt Ltd

Programmer Analyst – System Integration testing | Oct 2020' – June '2021

Client: Centrica

Domain: Energy & Utilities

Project: Bord Gáis Energy

Technology: Salesforce application, Oracle SQL, Oracle CC&B (Customer Care & Billing), CollectSure, Billing

System

- Wrote comprehensive **test scenarios** and **test cases** to validate the end-to-end functionality of the system, including customer onboarding, billing, payment processing, and non-payment actions.
- Tested the correctness of **electricity bill generation** based on the chosen billing plans (monthly, bi-monthly, and yearly), ensuring that the system calculated the correct amount based on the customer's consumption and billing cycle.
- Validated that customer who had not paid their bills received the appropriate **payment reminder notices** according to the system's business logic. Ensured that after a certain number of reminders, the customer's plan was correctly suspended.
- Used **Oracle SQL** to validate data stored in the **CC&B** application, ensuring that customer information, billing data, and payment history were accurate and consistent across all integrated systems.
- Performed integration testing between **Salesforce**, **CC&B**, and **CollectSure**, ensuring seamless data flow and synchronization between applications for accurate billing, payment tracking, and customer management.
- Identified and reported defects related to customer billing, payment processing, and integration issues. Worked closely with developers and business analysts to resolve defects before production deployment.
- Conducted **regression testing** during monthly and bi-monthly releases to ensure that any new changes to the application did not affect existing functionalities such as billing, payment reminders, or data integrity.
- Delivered monthly releases with **zero defect leakage**, ensuring that all billing and customer management processes functioned as intended in production.
- Ensured the **payment reminder notices** and **suspension workflow** for non-payment customers were implemented correctly
- Managed all identified defects using **Tricentis qTest**, ensuring effective tracking, prioritization, and resolution of issues throughout the testing lifecycle.
- Documented detailed defect reports, including steps to reproduce, expected vs. actual results, and any related logs or screenshots, facilitating quick resolutions and continuous improvement.
- Collaborated with development teams to ensure timely fixes and comprehensive regression testing.

Cognizant Technology Services Pvt Ltd

Programmer Analyst – Device Testing | Jan '2018 – Sept '2020

Client: Centrica

Domain: Energy & Utilities

Project: Centrica Hive Home

Technology: IoT device testing, JIRA, Test rail, Charles Proxy, Postman, Selenium, Cucumber JAVA

- Conducted in-depth testing of the firmware for various IoT devices (e.g., thermostats, window sensors,

door sensors). Responsible for ensuring seamless communication between devices and the central hub, identifying connectivity issues, and working with the development team to resolve them.

- Developed detailed test scenarios and test cases to validate device functionalities, including connectivity, firmware updates, and inter-device communication. Ensured that test cases were comprehensive and aligned with project requirements, user stories, and acceptance criteria.
- Led QA efforts for mobile applications used to control and operate IoT devices, ensuring all functionality was validated across different platforms. Created and executed test cases for features such as device pairing, control, monitoring, and error handling, ensuring the app provided a seamless user experience.
- Tested and validated geolocation-based features within IoT devices, such as geofencing, proximity-based triggers, and location-dependent actions. Developed test cases that simulated real-world scenarios to ensure the devices behaved as expected when interacting with mobile geolocation data.
- Implemented **automation test scripts** using **Selenium and Cucumber with Java**, reducing manual testing efforts and increasing efficiency for repetitive and regression testing tasks.
- Worked closely with the sales team to provide customers with a deep understanding of device functionalities, installation requirements, and how the devices can enhance their operations.
- Actively participated in troubleshooting IoT devices when they went offline, diagnosing issues related to network connectivity, firmware failures, or hardware malfunctions.
- Provided remote technical support to customers, guiding them through step-by-step troubleshooting processes to restore device functionality. Worked closely with the development team to identify and fix recurring problems.
- Utilized **JIRA** for defect tracking, managing the **defect lifecycle**, and collaborating with cross-functional teams for issue resolution and product improvements.

EDUCATION

2013-2017

Bachelor of Engineering, RMK College of Engineering & Technology, Tiruvallur

AWARDS AND ACKNOWLEDGEMENTS

- Continuous client appreciation for on-time test deliverables with zero defect leakage and zero escalation.
- Acknowledged by a key client for exceptional quality assurance and ensuring seamless mobile app integration
- **Recognized by senior management** for developing comprehensive test strategies that significantly improved test coverage and product reliability.
- APEX Award winner (FY'24 – Q1) – Individual Category for consistently applying new IT skills for impactful business outcome.
